

FATHIMA HARIS

Full Stack Developer

9037251087 | fathimannhl5@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-stack developer with hands-on experience building and deploying production-grade AI-integrated systems, including an LLM API gateway with rate limiting and multi-provider failover, and a retrieval-augmented Q&A application. Comfortable owning a project end-to-end: architecture, implementation, deployment, and documentation.

TECHNICAL SKILLS

Languages: JavaScript

Frontend: HTML5, CSS3, React.js, Vite, Tailwind CSS, Framer Motion

Backend: Node.js, Express.js, REST API design, JWT & bcrypt authentication

Databases & Infra: MongoDB (Atlas), Redis, Git & GitHub, Vercel, Render

AI / LLM: RAG pipelines, prompt engineering, Groq API, Gemini API, OpenRouter, embeddings & semantic similarity retrieval

PROJECTS

LLM Gateway — *Full-stack API gateway for LLM providers*

[Live App](#) | [GitHub](#)

- Built and deployed a multi-provider LLM proxy (Groq primary, OpenRouter/NVIDIA Nemotron fallback) with automatic failover, eliminating single-provider downtime risk.
- Implemented Redis-backed token-bucket rate limiting (10-token bucket, 1 refill/6s) and per-user API key management with usage logging, cost tracking, and monthly quota enforcement.
- Designed a semantic-style caching layer using Jaccard similarity to cut redundant LLM calls and reduce API cost.
- Developed a 7-page responsive React dashboard (auth, API key management, usage analytics) deployed on Vercel with an Express/MongoDB backend on Render.

DocuMind AI — *Retrieval-augmented PDF Q&A application*

[Live App](#) | [GitHub](#)

- Built a full-stack RAG application allowing users to upload PDFs and query them in natural language with page-level source citations.
- Engineered multi-document retrieval using cosine similarity thresholding and overlapping chunk windows to improve answer relevance across files.
- Implemented multi-user authentication (JWT + bcrypt), workspace management, and real-time upload progress tracking.
- Added retry-with-backoff logic to gracefully handle third-party API rate limits, documented alongside known architectural limitations in the README.

EDUCATION

Bachelor of Computer Applications (BCA), Computer Science

University of Kerala — Shree Vidhyadhiraja Arts and Science College | 2023 – 2026
